

VEHICLE SAFETY STANDARDS ATTESTATION

Pursuant to Phoenix City Code (PCC) Section 4-68 (B)(11), and the City of Phoenix Aviation Department Rules and Regulations (R&R) 08-01, Section 7 (Vehicle Requirements), "prior to operating on the airport, all ground transportation motor vehicles used by an authorized provider must have undergone, and successfully passed, within the previous twelve calendar months, an industry standard inspection..." and "...conducted by an ASE certified mechanic...".

The City of Phoenix Aviation Department's Ground Transportation Section, has aligned with Arizona Revised Statutes (A.R.S), Section 28-9555, passed in 2022, which requires all transportation vehicles to meet state vehicle safety and emissions standards for private vehicles and have at a minimum an annual brake and tire inspection that is performed by a qualified third party, **except** that if the vehicle is ten (10) years or less from the year of manufacture, the transportation driver may submit an attestation that the transportation vehicle meets the state vehicle safety and emissions standards for private vehicles instead of having the minimum annual brake and tire inspection.

I, _____,
Vehicle Owner, and/or Authorized Signer of _____

(Company), do hereby attest that the following vehicle is ten (10) years or less from the year of manufacture and meets vehicle safety and emissions requirements set forth by A.R.S Title 28.

Year _____

Make _____

Model _____

VIN _____

I understand the Aviation Department reserves the right to audit vehicle inspection records or request a physical copy at its discretion.
